Who

IoT Bootcamp is for organizations wanting to develop an increased understanding of the concepts of IoT and the positive impact it can have on their business development and strategies.

No matter what stage of the IoT Journey your organization is in, an IoT Bootcamp is an invaluable tool to identify, clarify, & illuminate the path to a successful IoT Product launch.

Why

Are you positioned to participate in the explosion of IoT opportunities? Do you understand the players, the technology? Do you need a clear vision?

With IoT Bootcamp Training, either on-site or online, your team will quickly understand and capture a clear understanding of key business goals and technical requirements that are key to your company's IoT success.

Our Approach

Our consistent approach drives proven and powerful results!

1 Assess

We get to know you, your team, and your systems to assess where you are and where you want to go.

2 Map

We map your path using workshops & collaboration, roadmaps, and clear strategies on how to get there.

3 Design

We develop an end-to-end system design and share how the data flows throughout the build.

4 Develop

Using agile principles, we build small, demo-able parts and give you a chance to weigh in throughout the project.

5 Maintain & Support

Our team delivers ongoing software updates and maintenance after launch.

What

IoT Bootcamp is a 3-hour, fast-paced course covering a variety of business and technology topics. It is designed to help business leaders, product managers, designers, engineers, and marketers understand the IoT landscape. Topics covered are an Intro to IoT with building blocks and value props, challenges to adopting IoT, creating value, and creating world-class products.

Benefits

You and your team will quickly get up to speed with the opportunities and risks associated with IoT development. You will understand the various layers, roles, and processes of a mature IoT solution.

Shared knowledge is built which helps to accelerate decisions and improve collaboration across your entire team creating an organizational alignment.

Visualizing the IoT Journey

Disconnected

NO IOT
INNOVATION

Learning about
the benefits
of IOT

Connecting

INNOVATING
BUT NOTHING
IN PRODUCTION

Inventing and
testing strategy,
creating proof

Connected

PRODUCTS IN
PRODUCTION

Aligning strategies
